

Auto-Leaver

This a Senior Sem Project, as such there has been aspects implement as requested by my professor.

Installation

A requirements.txt file is provided and lists all requirements needed for the project, to install `python -m pip install -r requirements.txt`

The project can run by running the module `python /path/to/src` or by running the main file `python /path/to/src/__main__.py`

this will generate an icon that looks like
